Building Communities of Opportunity

Capital Impact Partners believes every underserved community has the potential to be a strong, vibrant place of opportunity. We seek to address key social and economic justice issues and help ensure communities are built on a foundation of equity, opportunity, and inclusiveness.

A nonprofit Community Development Financial Institution, Capital Impact provides the capital and commitment to catalyze this potential and break the barriers to success.

We work with communities to create a strong fabric of high-quality services that foster good health, job creation, economic growth, and interconnectedness—empowering individuals to improve their lives and livelihoods.

Our holistic approach to community development

Aging in Community

Strengthen the ability of older adults to age in their community by applying an aging lens across all of our lending programs

Healthy Foods

Increase access to fresh and healthy food by expanding our work in food distribution, processing and production while maintaining support for neighborhood retailers

Cooperative Development

Develop food, worker, and housing co-ops through expanded national technical assistance programs, peer networks and capital delivery

Health Care

Support health care delivery innovations that are focused on prevention and whole person well-being

Education

Create more high-quality schools that deliver excellent educational outcomes for low-income students

Affordable Housing

Foster housing efforts that offer opportunities to build assets while preserving long-term affordability

Place-based Revitalization

Help revitalize and stabilize markets in investment-ready cities - like Detroit - by supporting equitable mixed-use, mixed-income development

Social Impact

CREATING SOCIAL IMPACT NATIONWIDE

Strategic Pillars

Address Systemic Poverty

Effect systemic change at scale—from social systems to government programs—so that all people have paths out of poverty

Create Equity

Support equitable access to quality services and economic opportunity regardless of race, ethnicity, gender, income or geography

Build Healthy Communities

Foster connections and social supports that strengthen the links between health, education, housing and opportunity that help people and communities thrive together

Promote Inclusive Growth

Build diverse, mixed-income communities that promote economic mobility and empower individuals to break the barriers to success
